Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 10, drawn to parallel read/write, classified in class 365, subclass 220.
 - II. Claims 2 and 11, drawn to serial read/write, classified in class 365, subclass 221.
 - III. Claims 3-4, 12, 14, drawn to parallel read/write, classified in class 365, subclass 220.
 - IV. Claims 5-9, 13, 15, 16, 18, drawn to signals, classified in class 365, subclass 191.
 - V. Claim 19, drawn to signals, classified in class 365, subclass 191.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as it requires one sense amplifier array. See MPEP § 806.05(d).
3. Inventions IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention V has separate utility such as it requires the least significant bit coupled to one of the plurality of I/O ports. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and field of search, restriction for examination purposes as indicated is proper.

Art Unit: 2824

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
